Re. Scientific Chemical Processing (SCP)-Carlstadt, New Jersey  
Administrative Order Index No. II-CERCLA-50114  
-----

Dear Mr. Warren:

As you are aware, paragraph 30A of the above-referenced Administrative Order requires the Respondents to that Order to appoint a Facility Coordinator who "shall be responsible for oversight of the implementation of this Order...." EPA was notified on March 18, 1987 that the Facility Coordinator would be changed from William Ward, of General Motors, to Thomas Morris, of International Business Machines.

Your letter dated May 6, 1988, addressed to Janet Feldstein, of my staff, provided a new list of contacts for the SCP-Carlstadt site, however, it failed to identify a Facility Coordinator as Mr. Morris has apparently ceased acting in this capacity. Accordingly, my staff has been using the May 6, 1988 letter as a guide for communications with the Respondents. However, I must note that EPA has still not been notified of a replacement for the Facility Coordinator. EPA hereby requests that you designate someone, in writing, to serve in this capacity immediately. Please be advised that the Facility Coordinator must have technical expertise to oversee adequately all aspects of the work contemplated under the Order and that counsel for the Respondents are not eligible to act as Facility Coordinator.

If you have any questions concerning this matter, please feel free to call Janet Feldstein or James Schmidtberger, of my staff, at (212) 264-2646.

Sincerely yours,

John V. Czapor, Chief  
Site Compliance Branch
